Designing Affective Vibrotactile Stimuli

Principal Investigator: Karon MacLean, Professor, Dept. of Computer Science, 604-822-8169

Co-Investigator: Hasti Seifi, Graduate Student, Dept. of Computer Science

Oliver Schneider, Ph.D. Student, Dept. of Computer Science

Salma Kashani, MSc., Dept. of Electrical and Computer Engineering

Matthew Chun, BSc., Dept. of Computer Science

Version 1.0 / 07 July, 2016

The following recruitment emails will be posted on craigslist and sent to mailing lists of different departments in UBC such as Computer Science, Music, and Psychology graduate students and a list of persons who have expressed an interest in being study participants.

From: Hasti Seifi

Subject: Call for Study Participants - \$15 for Designing and describing affective vibrotactile stimuli

The SPIN research group at the UBC Dept. of Computer Science is looking for participants for a study on designing and describing vibration patterns for a handheld or wristband device. You will receive a compensation of \$15 for your participation in a single 1 hour session.

To participate in the study email <mchun345@cs.ubc.ca > to schedule a time.

Please contact Hasti Seifi if you have any questions.

Hasti Seifi

PhD Student, UBC Computer Science
