Project Title: **Designing affective haptic stimuli**

Principal Investigator: Karon MacLean, Professor, Dept. of Computer Science, 604-822-8169

Co-Investigator: Hasti Seifi, Ph.D. Student, Dept. of Computer Science, 7789891650

Oliver Schneider, Ph.D. Student, Dept. of Computer Science, 604-827-3982

The purpose of this study is to understand usage scenarios and preferred notifications for everyday applications such as tracking a workout or timing a public talk. During the study, we may provide an imaginary everyday application or usage scenario and ask you to indicate the notifications that you would like to receive from a software application (e.g., cellphone or smartwatch application). We may ask you to structure or describe the notifications in a specific way (e.g., using metaphors, drawing). We may also ask you to attend to a set of visual, auditory, or tactile (e.g., vibrations) notifications and structure, modify, or describe the notifications based on some given criteria.

REIMBURSEMENT: \$1.50

TIME COMMITMENT: 20 minutes

CONFIDENTIALITY: *You will not be identified by name in any study reports. Any identifiable data gathered from this experiment will be stored in a secure Computer Science account accessible only to the experimenters.*

Please note that in using MTurk information about your participation is potentially available due to US law. In particular, the US Patriot Act which allows authorities access to the records of internet service providers. This survey does not ask for personal identifiers or any information that may be used to identify you. If you choose to participate in the survey, you understand that your responses to the survey questions will be stored and accessed in the USA.
