Project Title: Investigation of Tools and Techniques for Haptic Design Processes
(UBC Ethics # H14-01763)

Principal Investigator: Karon MacLean, Professor, Dept. of Computer Science, ███████████

As a part of our study process, we may want to contact you with our results for a brief conversation or email exchange some time after the study session. We want to make sure that our results accurately reflect your experience. This exchange is entirely optional and you are free to opt out at any time. If you consent to having us contact you after the study, please provide your contact information below. Your experimenter will be happy to answer any questions.

Note: This information will be kept in a secure, encrypted file, which will be deleted when our study is completed. No physical copy will be kept.

First name: _____

Email address: _____

Phone number (if no email address): _____
